

RSA Security Analytics Chalk Talk

Working with Packet Parsers

November 13th, 2015

Join us every 2nd Friday of the month for a new class

RSA

SECURITY OPS

The RSA Security Analytics "[Chalk Talk](#)" series provides you an opportunity to hear and learn from our **senior engineers** and other product experts at RSA. Learn how to make the most of your RSA Security Analytics deployment and hear tips and tricks to ensure the best experience possible. Since the classes are live you will have an opportunity to ask questions and provide feedback in real time.

New "Chalk Talk" classes will occur on the **2nd Friday of the month**. Past sessions will be archived and hosted on the [Community](#).

The next Chalk Talk is on "**Working with Packet Parsers**". We will discuss about the fundamental of Packet Parsers and how to start building your own parsers.

Please find the session details below & if you have any questions, please contact [Elizabeth Peters](#). We look forward to seeing you at our session!
