

# RSA NetWitness Platform

## Event Source Log Configuration Guide

## Artifactory

Last Modified: Tuesday, January 14, 2020

### Event Source Product Information:

**Vendor:** [Artifactory](#)

**Event Source:** Artifactory Log Parser

**Versions:** 3.3.0.1

**Additional Downloads:** sftpagent.conf.artifactory

Link: [Artifactory Additional Downloads](#)

### RSA Product Information:

**Supported On:** NetWitness Platform 10.0 and later

**Event Source Log Parser:** artifactory

**Collection Method:** File

**Event Source Class.Subclass:** Storage.Content Management System

# Configure Artifactory

---

To configure Artifactory, you must complete these tasks:

- I. Configure Artifactory to generate logs
- II. Set Up the SFTP Agent
- III. Configure the Log Collector for File collection

## Configure Artifactory to Generate Logs

---

By default logs are written to `/var/opt/jfrog/artifactory/logs`. You do not need to change anything on the Artifactory event source for it to generate these log files.

### Set Up the SFTP Agent

To set up the SFTP Agent Collector, download the appropriate PDF from RSA Link:

- To set up the SFTP agent on Windows, see [Install and Update SFTP Agent](#)
- To set up the SFTP agent on Linux, see [Configure SFTP Shell Script File Transfer](#)

### Configure the Log Collector for File Collection

Perform the following steps to configure the Log Collector for File collection.

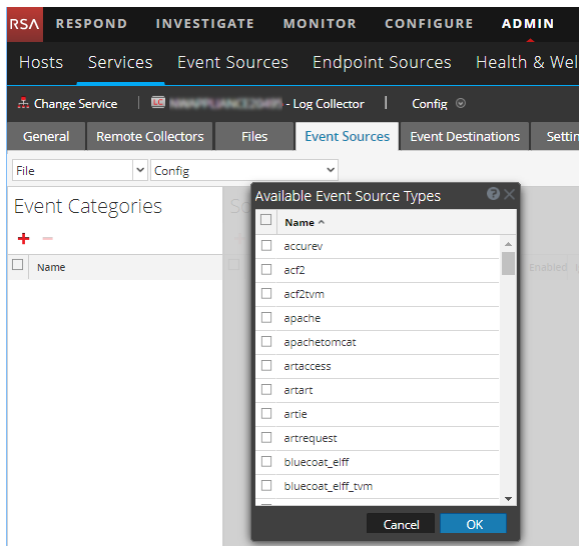

#### To configure the Log Collector for file collection:

1. In the **NetWitness** menu, select **ADMIN > Services**.
2. In the Services grid, select a Log Collector, and from the Actions menu, choose **View > Config > Event Sources**.
3. Select **File/Config** from the drop-down menu.

The Event Categories panel displays the File event sources that are configured, if any.

4. In the Event Categories panel toolbar, click **+**.

The Available Event Source Types dialog is displayed.

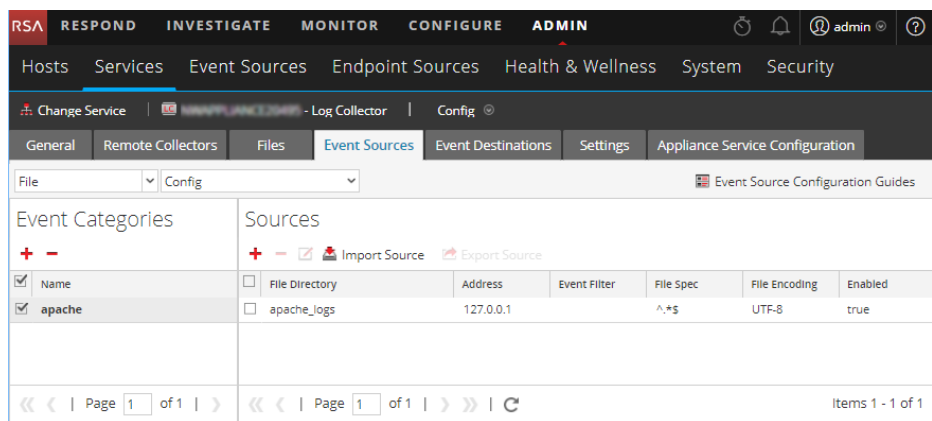

5. Select the correct type from the list, and click **OK**.

From the **Available Event Source Types** dialog, you need to select the following 4 Event Source Types:

- ART\_ACCESS
- ART\_ART
- ART\_IE
- ART\_REQ

The newly added event source type is displayed in the Event Categories panel.

**Note:** The image below uses **Apache** as an example only. Your screen will look different, depending on which Event Source type you are configuring.

6. Select the new type in the Event Categories panel and click **+** in the Sources panel toolbar.

The Add Source dialog is displayed.

**Note:** Again, the image below uses **Apache** as an example only. Your screen will look different, depending on which Event Source type you are configuring.

7. Add a File Directory name, modify any other parameters that require changes, and click **OK**.
8. Stop and Restart File Collection. After you add a new event source that uses file collection, you must stop and restart the NetWitness File Collection service. This is necessary to add the key to the new event source.
