## What is NetWitness Endpoint?

RSA NetWitness Endpoint is an endpoint detection and response tool that continuously monitors the behavior of all endpoints in the network to provide deep visibility and analysis of executables and processes. It helps to detect new, unknown, and targeted attacks, highlights suspicious activity for investigation, exposes anomalous behaviors, and determines the scope of compromise to help analysts respond to advanced threats faster.

### About this Guide

This guide provides end-to-end instructions to configure NetWitness Platform Endpoint and to use Endpoint features.

### RSA NetWitness Platform 11.3 Documentation in RSA Link

NetWitness Platform product documentation is organized along functional lines. If you are looking for a specific guide or version, go to the [Version 11.x Master Table of Contents](#).

Use these links to view the RSA NetWitness Platform 11.3 documentation. Both links provide the same documentation, in these two formats:

- HTML Guides include the latest information for currently supported 11.x versions: [RSA NetWitness Platform 11.x Documentation](#).
- PDF Guides provide the information for a specific version: [RSA NetWitness Platform 11.3 PDFs](#).

Use these links to access documentation that is not related to a particular version of the software:

- Hardware setup guides: <https://community.rsa.com/community/products/netwitness/hardware-setup-guides>
- Documentation for RSA Content such as feeds, parsers, application rules, and reports: <https://community.rsa.com/community/products/netwitness/rsa-content>.

### Getting Started

The following tasks can be performed in any sequence.

Description	References
<div style="text-align: center;">  <p>Incident Reponder (T1 Analyst)    Threat Hunter (T2/T3 Analyst)    System Administrator</p> </div>	
View information about product updates, improvements, and known issues.	<a href="#">Release Notes</a>

Description	References
Understand NetWitness Endpoint.	"Getting Started with NetWitness Platform" and "Investigate" in the <a href="#">NetWitness Platform Getting Started Guide</a>

## Setup and Installation

### Fresh Installation

The following tasks must be performed in the sequence listed.

Description	References
	 System Administrator
Obtain a license for Endpoint Log Hybrid.	<a href="#">Licensing Management Guide</a>
Review the supported hardware.	"Supported Hardware" in the <a href="#">Physical Host Installation Guide</a>
Review the Endpoint architecture; plan your deployment based on the number of endpoints, distribution, and location of these endpoints; and choose one of the following deployments: <ul style="list-style-type: none"> <li>• Single Endpoint server</li> <li>• Multiple Endpoint server</li> </ul>	"NetWitness Endpoint Architecture" in the <a href="#">Deployment Guide</a>
Configure the ports on your firewall.	"Network Architecture and Ports" in the <a href="#">Deployment Guide</a>
Install NetWitness Server and other components. For a single Endpoint server deployment, you need to install - NetWitness Server, Endpoint Log Hybrid, and ESA. For a multiple Endpoint server, in addition to the above components, you need to install - Additional Endpoint Log Hybrid, NetWitness Broker along with Endpoint Broker installed on it.	<ul style="list-style-type: none"> <li>- <a href="#">Physical Host Installation Guide</a> for instructions on how to set up physical hosts</li> <li>- <a href="#">Virtual Host Installation Guide</a> for instructions on how to set up virtual hosts</li> </ul>
Install Endpoint Log Hybrid.	"RSA NetWitness Endpoint" in the <a href="#">Physical Host Installation Guide</a>
Review the services installed.	<a href="#">Hosts and Services Getting Started Guide</a>

Description	References
<p><b>Note:</b> Review the default policies and modify them accordingly.</p> <p>Install Endpoint agent on hosts.</p>	<p>"Endpoint Sources" topic in the <a href="#">Endpoint Configuration Guide</a></p> <p><a href="#">NetWitness Endpoint Agent Installation Guide</a></p>

## Upgrade

The following tasks must be performed in the sequence listed.

Description	References
 System Administrator	
<p>Upgrade from 10.6.5 to 11.3 -</p> <p>After the NetWitness Platform 11.3 upgrade, install the Endpoint Log Hybrid and other Endpoint components.</p>	<ul style="list-style-type: none"> <li>- <a href="#">Physical Host Upgrade Guide</a> for instructions on upgrade of physical hosts</li> <li>- <a href="#">Virtual Host Upgrade Guide</a> for instructions on upgrade of virtual hosts</li> </ul>
<p>Update from 11.x to 11.3 -</p> <p>Update the Endpoint server and agents.</p>	<p><a href="#">Update Guide</a></p>
<p>Upgrade Endpoint Agents from 11.1.x and 11.2.x to 11.3.</p>	<p>"Upgrade Agents" in the <a href="#">Endpoint Agent Installation Guide</a></p>
<p>Migrate NetWitness Endpoint 4.4.0.x to NetWitness Platform.</p>	<p><a href="#">NetWitness Endpoint 4.4.0.x to RSA NetWitness Platform 11.3 Migration Guide</a></p>

## Configuration

The following tasks can be performed in any sequence.

Description	References
 System Administrator	
<p>Understand NetWitness Endpoint and high-level tasks required for configuration.</p>	<p>"NetWitness Endpoint Overview and Endpoint Server Configuration" in the <a href="#">Endpoint Configuration Guide</a></p>
<p>Review Groups and Policies for agents.</p>	<p>"Endpoint Sources" topic in the <a href="#">Endpoint Configuration Guide</a></p>

Description	References
Set up the RSA Live account and verify if the ESA content and Application Rules for Endpoint are available.  <b>Note:</b> The file reputation service is automatically enabled on RSA Live.	<a href="#">Live Services Management Guide</a>
Create role-based access control (RBAC).	"Role Permissions" in the <a href="#">System Security and User Management Guide</a>
Configure data retention policy.	"Configure Data Retention" in the <a href="#">Endpoint Configuration Guide</a>
Manage inactive agents.	"Manage Inactive Agents" in the <a href="#">Endpoint Configuration Guide</a>

## Investigation

The following tasks can be performed in any sequence.

Description	References
 <small>Content Expert (Threat Intelligence)    Incident Responder (TI Analyst)    Threat Hunter (T2/T3 Analyst)</small>	
Understand how investigation works.	"How NetWitness Investigate Works" in the <a href="#">NetWitness Investigate User Guide</a>
Configure investigate views.	"Configuring NetWitness Investigate Views and Preferences" in the <a href="#">NetWitness Investigate User Guide</a>
Begin an investigation in different Investigate views.	"Beginning an Investigation" in the <a href="#">NetWitness Investigate User Guide</a>
Review best practices for files and hosts and set up your Investigate view for investigation.	"Best Practices" under Investigating Files and Investigating Hosts in the <a href="#">NetWitness Endpoint User Guide</a>
Investigate files.	"Investigating Files" in the <a href="#">NetWitness Endpoint User Guide</a>
Investigate hosts.	"Investigating Hosts" in the <a href="#">NetWitness Endpoint User Guide</a>
Investigate process.	"Investigating Hosts" in the <a href="#">NetWitness Endpoint User Guide</a>

Description	References
Analyze downloaded files.	"Analyzing Downloaded Files" in the <a href="#">NetWitness Endpoint User Guide</a>
Change file status and remediate.	"Changing File Status or Remediate" in the <a href="#">NetWitness Endpoint User Guide</a>
Analyze events.	"Analyzing Events" in the <a href="#">NetWitness Endpoint User Guide</a>  "Analyzing Raw Data and Metadata in the Event Analysis View", "Investigating Metadata in the Navigate View", and "Examining Raw Events in the Events View" in the <a href="#">NetWitness Investigate User Guide</a>

## Respond and Reporting

The following tasks can be performed in any sequence.

Description	References
  Incident Responder (T1 Analyst)      Threat Hunter (T2/T3 Analyst)	
Respond to Endpoint incidents.	<a href="#">NetWitness Respond User Guide</a>
View reports related to Endpoint data.	<a href="#">Reporting User Guide</a>

## Maintenance

The following tasks can be performed in any sequence.

Description	References
 System Administrator	
Monitor health and wellness.	<a href="#">System Maintenance Guide</a>

## Integration (for Legacy NetWitness Endpoint)

The following tasks can be performed in any sequence.

Description	References
	 <p>System Administrator</p>
<p>Configure NetWitness Endpoint 4.4.x metadata with NetWitness Platform.</p>	<p>"Integrating NetWitness Endpoint 4.4.0.2 or Later with NetWitness Platform" topic in the <a href="#">Endpoint Configuration Guide</a></p>
<p>Configure integrated operation of NetWitness Endpoint 4.4.x with NetWitness Platform.</p>	<p><a href="#">RSA NetWitness Endpoint Integration Guide</a></p>
